

TIMELESS AND DURABLE OUTDOOR FURNITURE

Our story began in the 1930s when Henri INDERCHIT, doll's armchair craftsman, responded to a request from a bistro owner who wanted to equip his terrace with human-sized director's chairs. **And so the F101 model was born.**

The director's chair model took off in the 1950s, becoming an iconic object. It was at this time that Henri's son Louis designed **the famous red terrace at the Café Sénéquier.** A partnership between our two companies that still exists today.

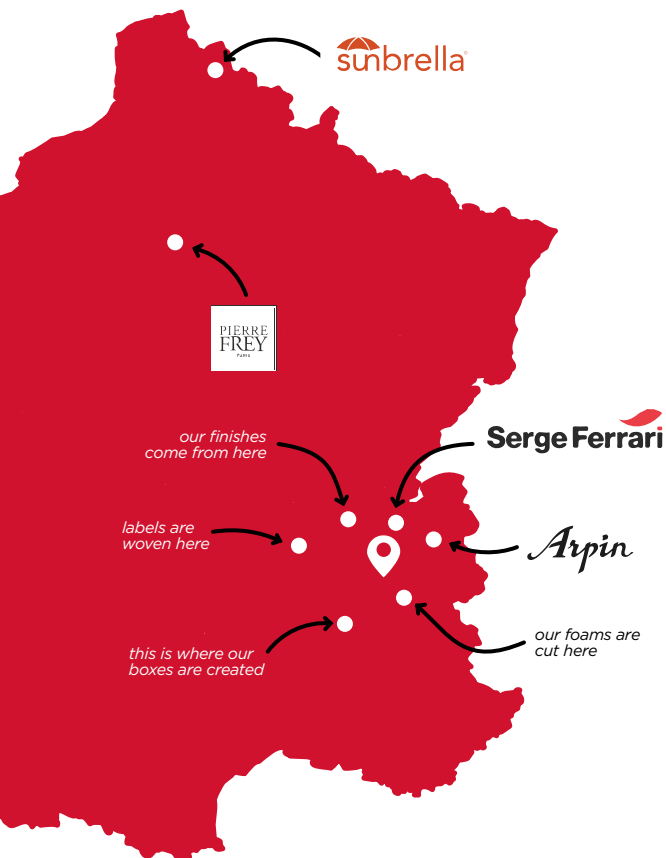

The family business became AZUR CONFORT in 1989, with the arrival of the third generation of INDERCHIT.

Since its takeover by Raphaël VOISINE in 2016, Azur Confort has become a reference in wooden outdoor furniture. Today, we offer catering and hospitality professionals a **complete range of furniture designed with eco-design in mind,** manufactured in our French factory.

Azur Confort offers a complete range of services to help you design your outdoor spaces.

■ DURABLE AND CUSTOMISABLE FURNITURE

From the outset, Azur Confort furniture has been designed for durability and ecological impact : this is what we call **durable, long-lasting furniture.**

To manufacture our furniture, we use wood species from Europe (*robinia, beech, chestnut, larch*) sourced locally. This choice significantly reduces the ecological impact of our furniture.

Our foams and fabrics are selected for their technical sophistication and high quality. To achieve this, we work with **local partners who are experts in their field** and with whom we share the values of Made in France.

Choice of colours, fabrics, screen printing, ...
Customising your furniture allows you to **create a unique terrace that reflects your company's image.**

■ FINITIONS

LACQUER

Our signature finish : lacquer covers the wood completely, giving the furniture protection, shine and colour. You can choose from a range of twenty colours to create your own terrace.

WOODSTAIN

Woodstain brings out the look of wood while protecting it. Less opaque and glossy than lacquer, you can choose between a light, dark or coloured woodstain.

OIL

Oil is a light finish that enhances wood: it impregnates the wood with a light tint, and protects it from outdoor weathering.
